

# ... ONE APP TO TREAT THEM ALL ...

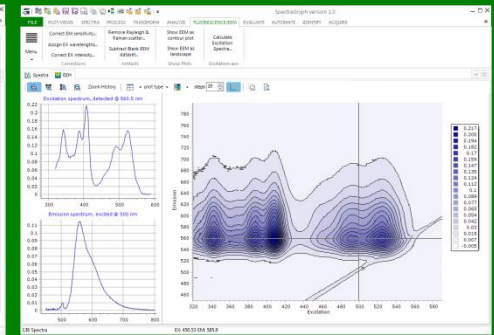

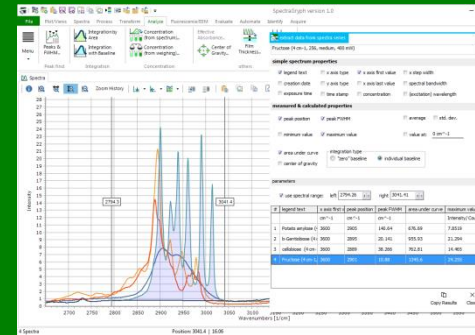

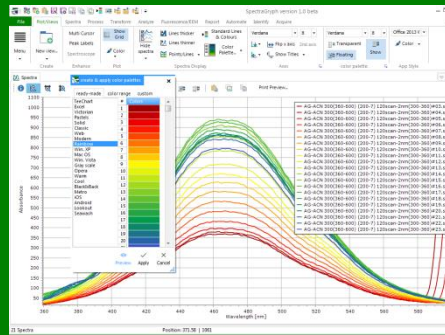

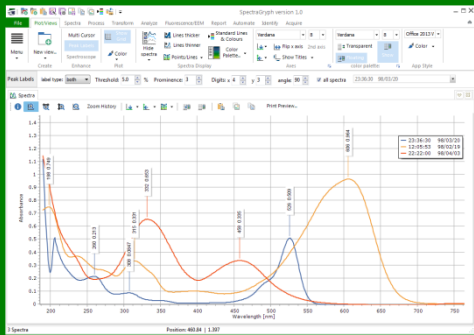

## Tired & Exhausted of:

- Booking spectrometer time just to process your spectral data?
- Stupefying conversion of original spectral files all the time?
- Having to use Origin or even Excel to bring your spectra together?

## Put an end to your suffering with the new Spectragryph software!

- 89 spectral file formats (*Thermo, Jcamp-DX, Omnic, Bruker, JASCO, Shimadzu, Andor, ASD Terraspec, PerkinElmer, Agilent, Horiba, Avantes, OceanOptics, StellarNet, B&W Tek, Hitachi, Yokogawa, Renishaw, Roper, FOSS, EMSA, ...*)
- Ready for UV-VIS, NIR, FTIR, Raman, LIBS, XRF, fluorescence data
- Easy to use. Rock solid. Lean. Unbeatable. Powerful. Instant plots. Batch export.
- Spectra processing automation. Spectral library search. Spectrometer control.

## Spectragryph 1.2.16 software for optical spectroscopy

**Spectroscopy Ninja** – providing optical spectroscopy software since 2002 (free for academic use)
